Office Action Date: 02.01.2007 Amendment Date: 4/26/2007 03/08

## **Listing of Claims:**

This listing of claims replaces all prior versions and listings of claims in the application.

- A bent tube having a bend configuration comprising: 1. (Previously Presented)
  - a curve extending between first and second ends;
  - a portion of the curve being a circular arc; and
- a clothoid transition portion extending from the second end toward the circular arc having a radius of curvature decreasing from zero curvature to a radius of curvature of the circular arc at a point of integration.
- 2. (Canceled)
- 3. (Previously Presented) The tube of claim 1 including a second transition portion extending from the arc portion toward the first end having a curvature decreasing from the bending radius of the arc to the zero curvature.
- The tube of claim 1 wherein the curve subtends an angle of 90 degrees. 4. (Original)
- 5. (Original) The tube of claim 1 wherein the curve subtends an angle greater than 90 degrees.
- 6. (Previously Presented) The tube of claim 1 wherein the curve subtends an angle less than 90 degrees.
- 7. (Canceled)
- 8. (Canceled)

Application Number: 10/611,842

Filed: 07.01.2003

Office Action Date: 02.01.2007 Amendment Date: 4/26/2007

9. (Currently Amended) A draw die for tube bending, the die having a bending surface configuration comprising:

a curve extending between first and second ends;

a portion of the curve being a circular arc; and

a clothoid transition portion extending from the second end toward the circular arc having a radius of curvature decreasing from zero curvature to a radius of curvature of the circular arc at a point of integration; and,

## The draw die of claim-7

including a second transition portion extending from the arc portion toward the first end having a curvature decreasing from the bending radius of the arc to the zero curvature.

- 10. (Currently Amended) The draw die of <u>claim 9 elaim 7</u> wherein the curve subtends an angle of 90 degrees.
- 11. (Currently Amended) The draw die of <u>claim 9 elaim 7</u>-wherein the curve subtends an angle greater than 90 degrees.
- 12. (Currently Amended) The draw die of <u>claim 9 elaim 7</u>-wherein the curve subtends <u>and an</u> angle less than 90 degrees.
- 13. (Previously Presented) The bent tube of claim 1, wherein the shape and arc length of the transition portion is defined by a length and an angle of the portion of the curve being the circular arc.
- 14. (Currently Amended) The draw die of <u>claim 9 elaim 7</u>, wherein the shape and arc length of the transition portion is defined by a length and an angle of the portion of the curve being the circular arc.
